PROFESSIONAL SUMMARY

Data Analyst with experience in product, marketing, and quantitative analytics across startup and large-scale data projects. Skilled in SQL and Python for forecasting, KPI tracking, dashboard development, and business performance analysis. Experienced in translating complex datasets into actionable insights through funnel analysis, segmentation, A/B testing, and predictive modeling. Passionate about solving real-world problems using data-driven decision making.

CORE SKILLS

Python, SQL | Predictive Modeling, Forecasting, Statistical Analysis | Tableau, Power BI, Excel, Looker Studio | BigQuery, PostgreSQL | A/B Testing, Cohort Analysis, Segmentation | ETL, Data Visualization, Git

PROFESSIONAL EXPERIENCE

Performance Marketing & Analytics Analyst | WhatYouTech | Apr 2023 – Oct 2023 | Hybrid | India

- Managed analytics for **6 Google Ads campaigns (€3K–€8K/month)**, increasing conversion from **2.1% to 2.7% (+28%)**
- Built SQL-based funnel analysis (impressions → clicks → conversions), identifying drop-offs and improving conversion
- Conducted cohort and retention analysis, improving **ROI by 15–20%** through targeted strategies
- Designed and evaluated **A/B tests (8K–15K users/test)**, increasing **CTR by 10–12%**
- Developed stakeholder dashboards enabling faster campaign optimization and budget allocation
- Segmented users by behavior and channel, reducing **CPA by ~10%**

Web & Analytics Developer | ThoughtStart | Dec 2021 – Jun 2022 | Remote | India

- Implemented analytics tracking for LMS platform using Google Analytics
- Analyzed **~10K+ users/month**, reducing bounce rate from **~58% to ~46%**
- Improved site performance (**load time ↓ ~30%**), increasing engagement and enrollments

KEY ANALYTICS PROJECTS

Built projects independently to gain hands-on exposure in real-world analytics, forecasting, large-scale data processing, and business problem solving beyond academic coursework.

Transport Network Analysis & Optimization System | Python, NetworkX, SQL, Tableau | 2026 | [🔗](#)

- Processed and analyzed **34M+ GTFS records** to identify delay patterns and network inefficiencies
- Built regression and classification models to predict delays across transport systems
- Applied graph algorithms (shortest path, network modeling) to optimize route efficiency
- Developed a simulation framework to evaluate system performance under varying conditions
- Developed route-level analytics to evaluate transport flow, congestion trends, and network efficiency

E-Commerce Sales Performance Analysis | SQL, BigQuery, Looker Studio | 2026 | [🔗](#)

- Analyzed **1M+ transactions** to identify revenue drivers, customer segments, and purchasing behavior
- Built conversion funnel (view → cart → purchase), identified **~30% checkout drop-off**, proposed UX improvements
- Developed KPI dashboard tracking revenue, AOV, and conversion rate supporting performance monitoring
- Evaluated pricing and bundling scenarios using data insights to assess revenue optimization opportunities

Data Job Market Analysis – Germany | Python, Pandas, NumPy, Matplotlib | 2026 | [🔗](#)

- Processed **50K+ job postings** analyzing demand for SQL, Python, and BI tools across Germany
- Built automated preprocessing pipeline reducing manual effort by **~40%** and improving dataset consistency
- Identified high-demand skill clusters and salary trends aligning job strategy with market expectations

EDUCATION

M.Sc. Data Analytics | Berlin School of Business & Innovation, Berlin | Feb 2024 – Sep 2025 | GPA: 2.3

- Applied regression and classification models for predictive analytics and pattern analysis
- Developed transport delay prediction and optimization system using real-world GTFS datasets

B.E. Information Technology | University of Mumbai, India | Aug 2019 – Jul 2023 | GPA: 8.6 / 10

- Strong foundation in data structures, databases, and algorithms

LANGUAGES

English (**Fluent**) | German (**B1 – Intermediate**) | Hindi (**Native**)
